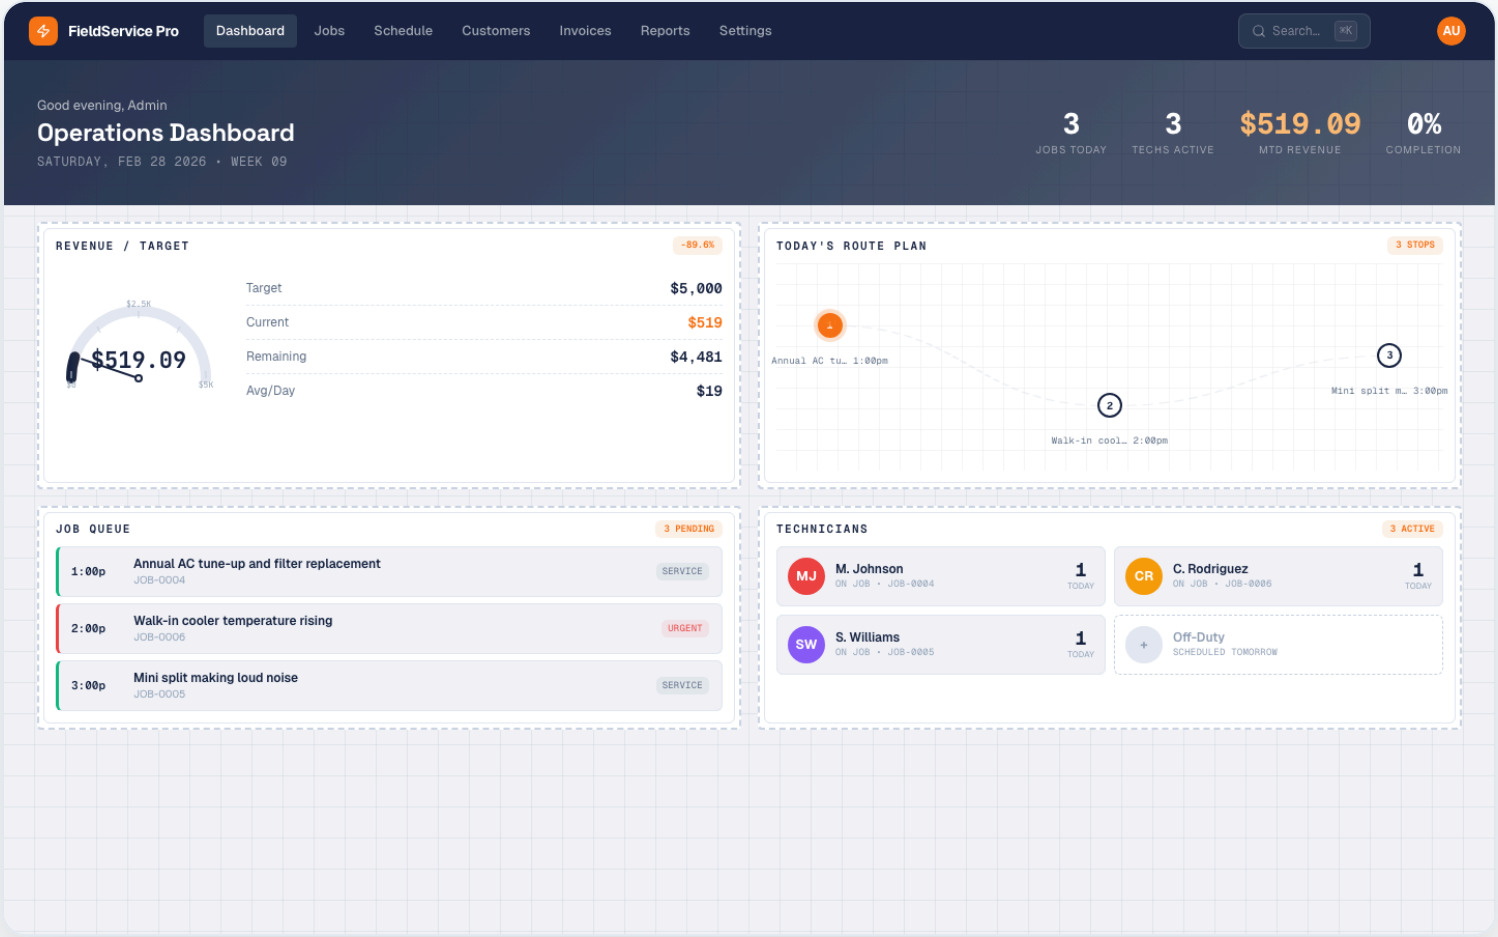
COMMAND CENTER

Your Business at a Glance

A customizable dashboard that shows exactly what matters — revenue, jobs, team performance, and upcoming work.

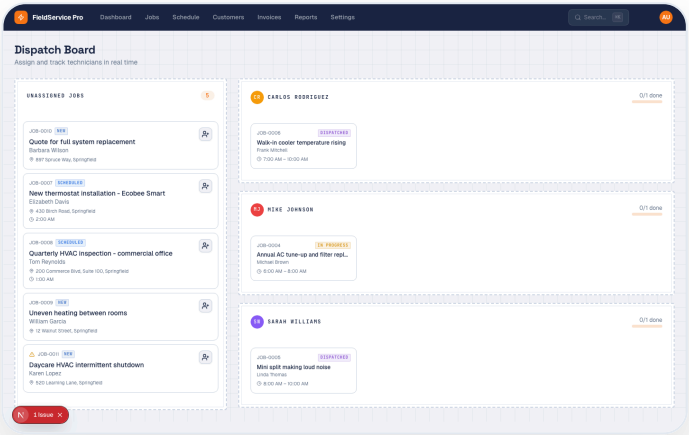


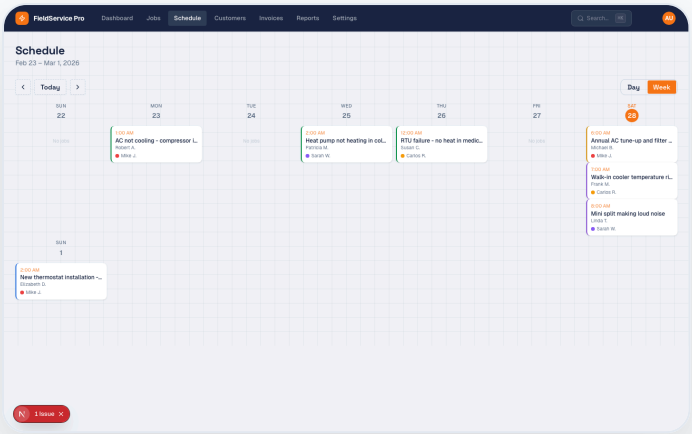
REAL-TIME OPERATIONS

Dispatch Board

See every unassigned job and every technician's workload at once. Assign, reassign, and track jobs in real time.

- Live unassigned job queue with priority flags
- Technician workload cards with completion tracking
- Color-coded technicians for instant visual identification
- Emergency job highlighting for critical calls





CAPACITY PLANNING

Visual Schedule

Week and day calendar views make it easy to plan technician routes, spot gaps, and avoid overbooking.

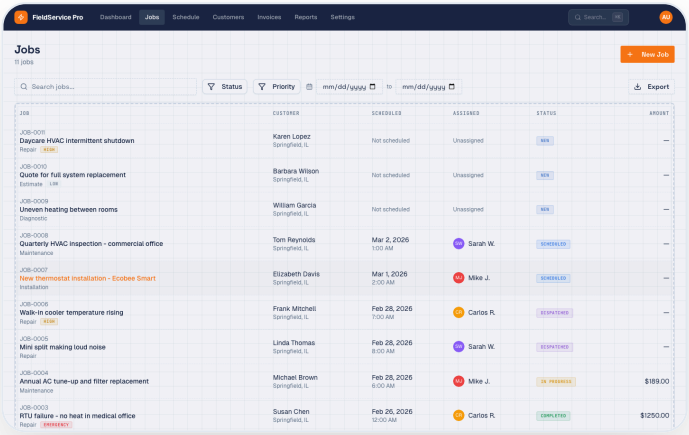
- Week and day view toggle
- Color-coded jobs per technician
- Click any slot to create a new job
- Navigate forward/back with date range display

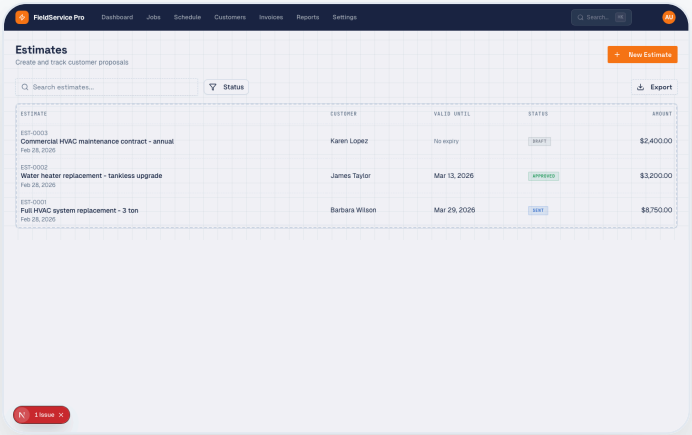
WORKFLOW ENGINE

Job Management

Track every job from first call to final invoice. Filter by status, priority, technician, or date range — find anything in seconds.

- Full lifecycle tracking: new → scheduled → dispatched → in progress → completed
- Priority levels with emergency flagging
- Automatic job numbering (JOB-0001, JOB-0002, ...)
- Detailed job pages with notes, photos, checklists, and history





WIN MORE BUSINESS

Good / Better / Best Estimates

Present customers with multiple options to maximize close rates. Each option has its own line items, pricing, and recommended flag.

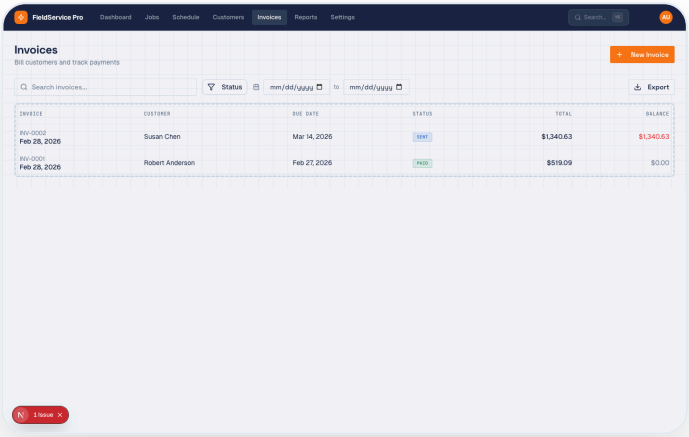
- Multi-option proposals (Good / Better / Best)
- Star a recommended option to guide customer choice
- Customer approval tracking with digital signatures
- One-click convert approved estimates to jobs

GET PAID FASTER

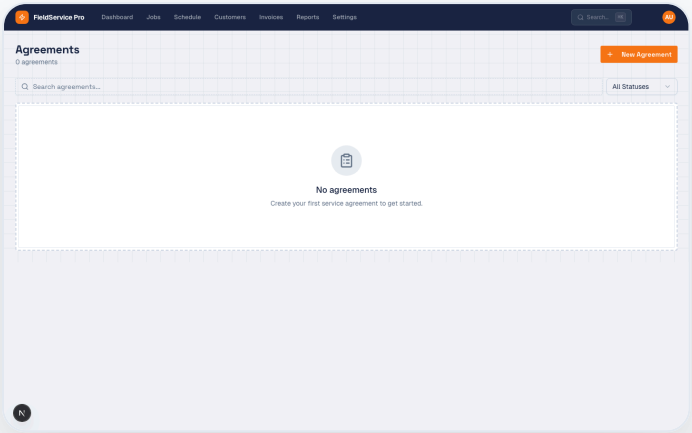
Invoicing & Payments

Generate invoices from jobs or from scratch, send them to customers, and collect payments online via Stripe.

- Status tracking: draft → sent → viewed → paid
- Online payments via Stripe Checkout
- Partial payment support with balance tracking



- Overdue invoice alerts and automated reminders



RECURRING REVENUE

Service Agreements

Set up maintenance contracts with automatic visit scheduling, billing, and renewal — the key to predictable recurring revenue.

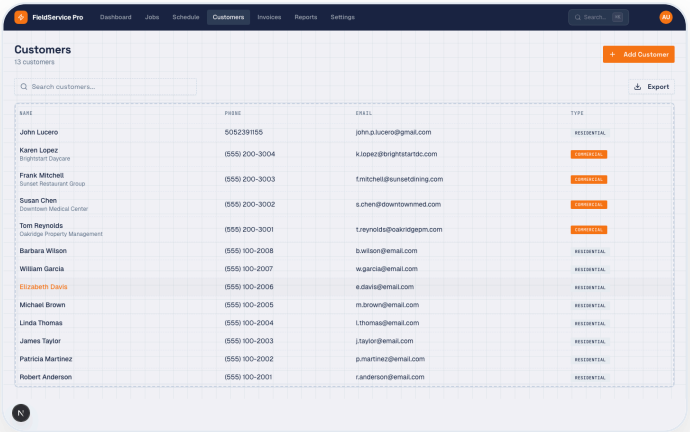
- Flexible billing cycles (monthly, quarterly, annual)
- Automatic visit scheduling and job creation
- Renewal reminders and auto-renewal option
- Full agreement lifecycle: draft → active → completed

360° CUSTOMER VIEW

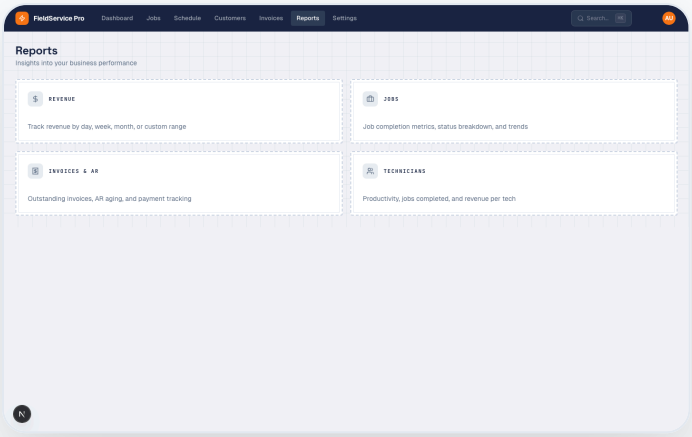
Customer Management

A complete CRM built for field service — every customer's properties, equipment, job history, invoices, and estimates in one place.

- Residential and commercial customer types
- Multi-property support per customer
- Equipment tracking with serial numbers and warranty dates



- Full service history with linked jobs, invoices, and estimates



BUSINESS INTELLIGENCE

Reports & Analytics

Make data-driven decisions with built-in reports covering revenue, job performance, invoicing, and technician productivity.

- Revenue reports with period-over-period analysis
- Job completion metrics and status breakdowns
- Accounts receivable aging reports
- Technician productivity and utilization tracking

AND MUCH MORE

Everything You Need, Built In

No third-party add-ons or workarounds — every feature integrates seamlessly.

Customer Portal

Your customers log in to view jobs, approve estimates, pay invoices, and track service agreements — all self-service.

Tenant Websites

Each business gets a built-in website builder with pages, themes, media library, and online booking forms.

Pricebook

Maintain a catalog of services and materials with standardized pricing. Pull items directly into estimates and invoices.

Automated Communications

Email templates triggered by events — invoice sent, estimate approved, job scheduled, agreement renewal — all automatic.

Mobile App

React Native app for technicians with offline support, voice-to-text notes, photo capture, and field-ready high-contrast mode.

Fully Configurable

Company profile, team roles (5 levels), services, tax rates, business hours, checklist templates, estimate templates, and 7 dashboard themes.

Team & Roles

Invite team members with role-based access control — Admin, Office Manager, Dispatcher, CSR, and Technician roles built in.

Stripe Payments

Accept online payments through the customer portal via Stripe Checkout. Support for partial payments and automatic receipt emails.

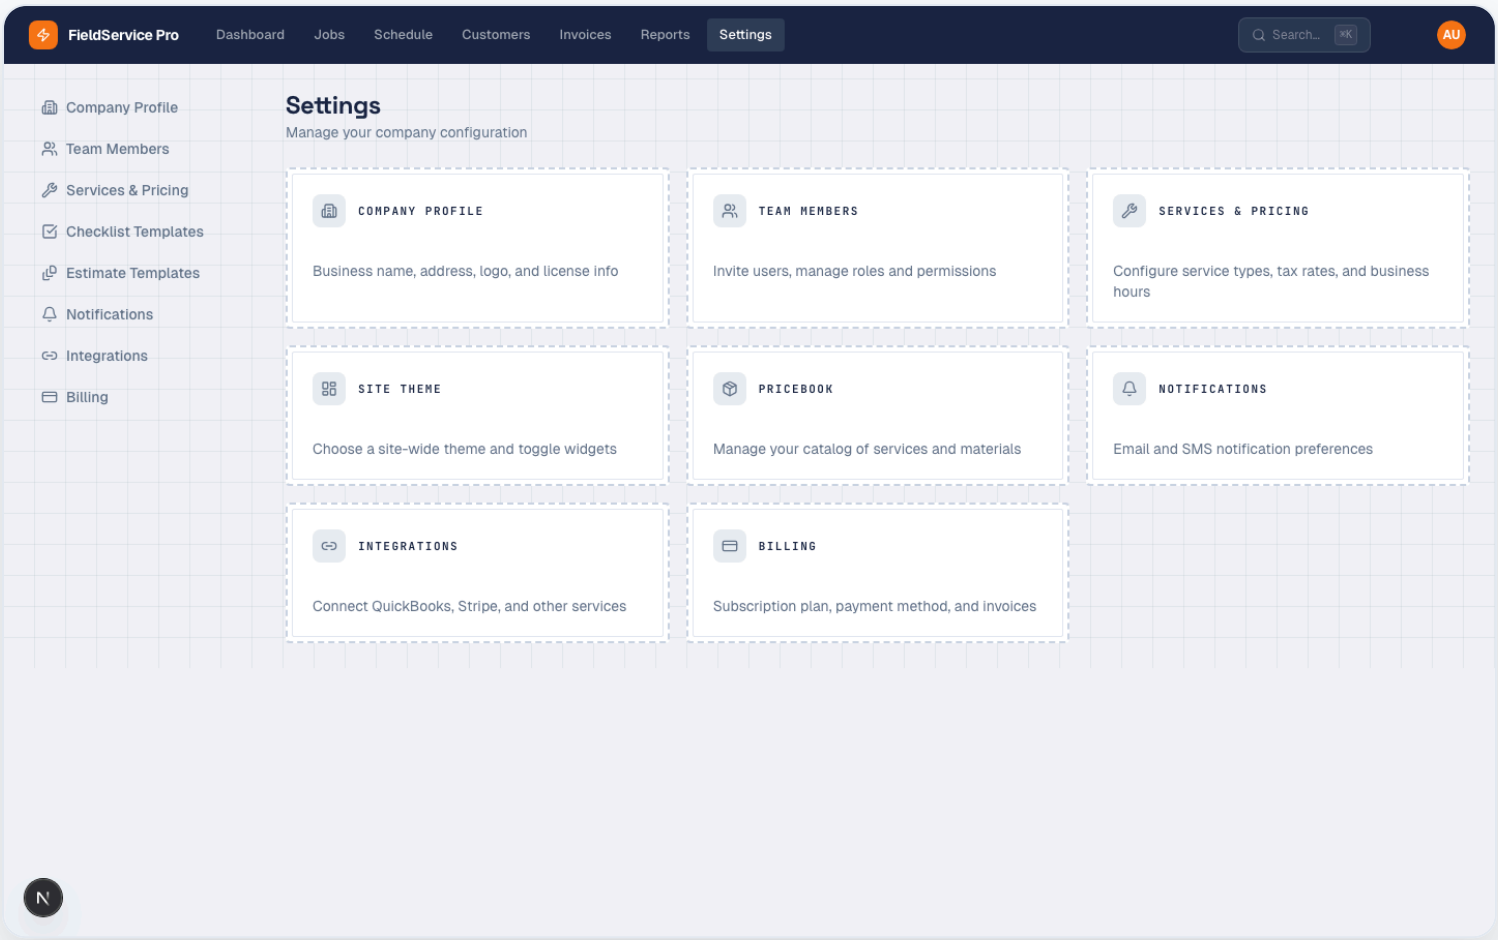
REST API

50+ versioned API endpoints power the mobile app and enable integrations. Built for extensibility from day one.

CONFIGURATION

Simple Setup, Deep Customization

Get running in minutes with sensible defaults, then customize every aspect of your workflow.

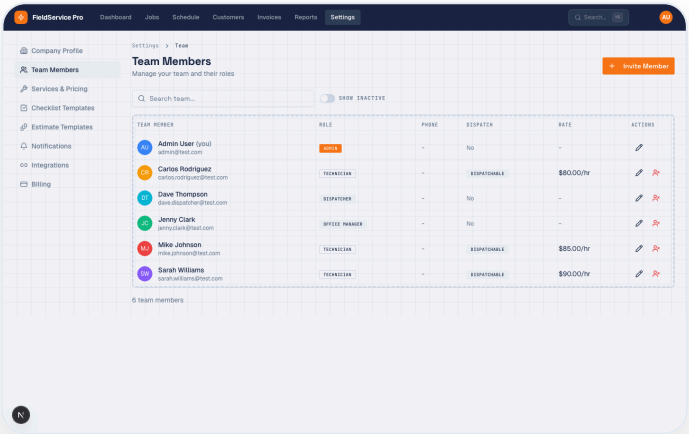


ACCESS CONTROL

Team Management

Invite your team and assign the right level of access. Five built-in roles ensure everyone sees exactly what they need.

- **Admin** — Full access to everything
- **Office Manager** — Billing, customers, reports
- **Dispatcher** — Schedule and dispatch jobs
- **CSR** — Customer service and intake



- **Technician** — Field work and mobile access
